

Style guide

Con el concepto de que el clima es algo que nos envuelve, se generó una paleta de colores para utilizar como gradientes a la hora de ilustrar el estado del tiempo en cada ciudad, y fue aplicada en el fondo de toda la web en forma dinámica, simbolizando la naturaleza cambiante del clima. A su vez se generó un set de iconografía para facilidad de lectura por parte del usuario, potenciando la experiencia de este en el sitio.

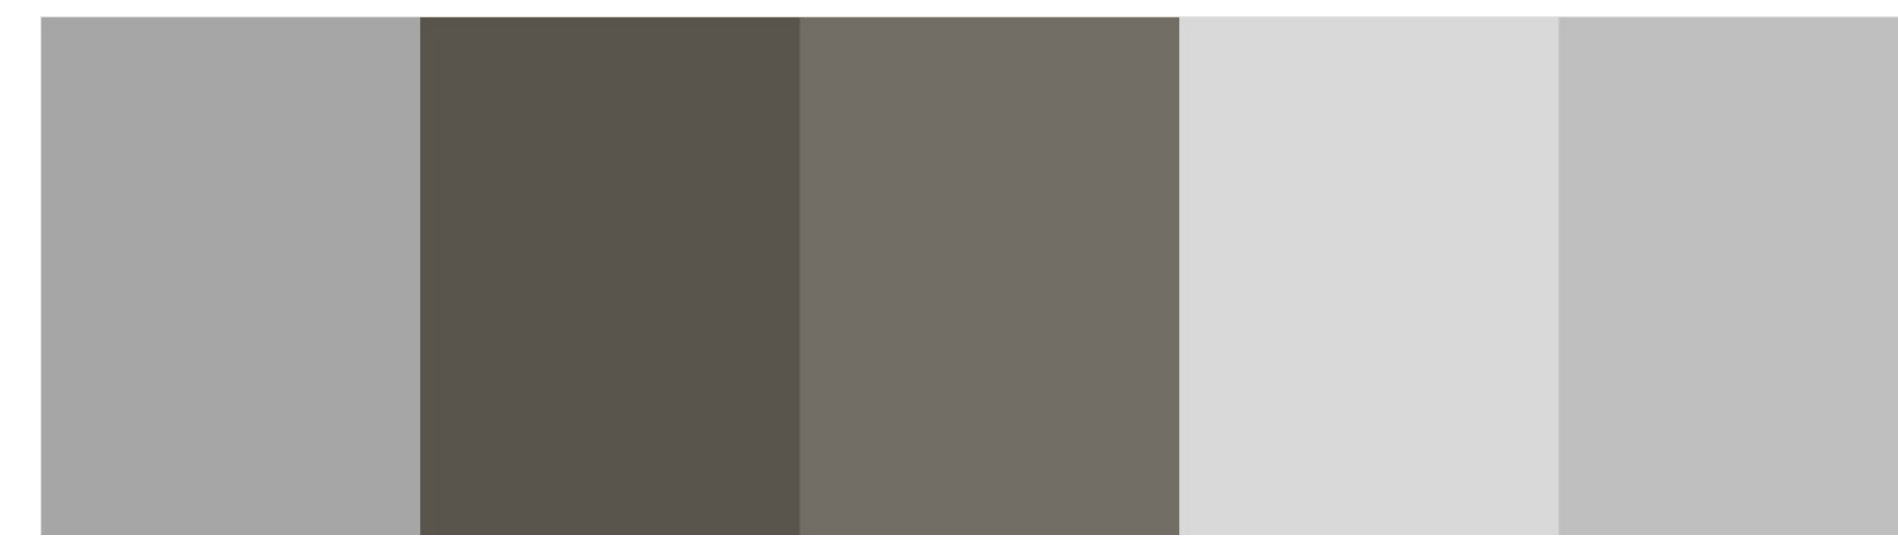

Drizzle
